

HandsMen Threads: Elevating the Art of Sophistication in Men's Fashion

Overview: The goal of this project is to develop and implement a Salesforce CRM system for HandsMen Threads, a luxury men's fashion brand. This system will help the company build stronger relationships with customers, efficiently organize and track sales activities, and enhance marketing efforts. By using Salesforce tools and automation, HandsMen Threads can streamline its business processes, improve customer engagement, and boost overall productivity.

Objectives: The main goal of this project is to create a Salesforce CRM system that helps HandsMen Threads manage its customers, sales, and marketing in one place. This system will make it easier to handle customer information accurately, keep track of orders and inventory, and send automatic updates when needed. It will also help the company grow by improving communication with clients and making it easier to manage stock and sales data.

Data Management – Objects

The screenshot displays the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main content area shows a list of custom objects with columns for Label, API Name, Type, and Description. The objects listed are Marketing Campaign, Inventory, HandsMen Order, HandsMen Product, and HandsMen Customer. A user profile dropdown menu is visible on the right, showing the user's name, email, and options to switch to Salesforce Classic or add a username.

LABEL	API NAME	TYPE	DESCRIPTION
Marketing Campaign	Marketing_Campaign__c	Custom Object	
Inventory	Inventory__c	Custom Object	
HandsMen Order	HandsMen_Order__c	Custom Object	
HandsMen Product	HandsMen_Product__c	Custom Object	
HandsMen Customer	HandsMen_Customer__c	Custom Object

SETUP

Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and to add Lightning Pages to Lightning Experience and the mobile app.

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, Scoping Rules, Object Access, and Triggers. The main content area is titled "HandsMen Order" and displays "Validation Rules" with 1 item, sorted by Rule Name. A table lists the validation rules:

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Total_Amount	Total Amount	Please Enter Correct Amount	✓	Rayniel Joshua Lucido

On the right, a user profile dropdown for Rayniel Joshua Lucido is visible, showing options for display density (Comfy, Compact) and options to switch to Salesforce Classic or add a username.

Data security – Profiles

The screenshot shows the Salesforce Setup interface for Profiles. The left sidebar includes a search bar with "profiles" entered and a list of users. The main content area is titled "Profiles" and displays a table of profiles. The table has columns for Action, Profile Name, User License, and Custom. The profiles listed are:

Action	Profile Name	User License	Custom
☐ Edit Delete	Salesforce API Only System Integrations	Salesforce Integration	✓
☐ Edit Clone	Silver Partner User	Silver Partner	☐
☐ Edit Clone	Solution Manager	Salesforce	☐
☐ Edit Clone	Standard Platform User	Salesforce Platform	☐
☐ Edit Clone	Standard User	Salesforce	☐
☐ Edit Clone	System Administrator	Salesforce	☐

On the right, a user profile dropdown for Rayniel Joshua Lucido is visible, showing options for display density (Comfy, Compact) and options to switch to Salesforce Classic or add a username.

Data Security – Roles

Salesforce Setup interface showing the **Roles** section. The left sidebar contains navigation links: Setup, Home, Object Manager, Roles, Users, Feature Settings, Sales, Service, Case Teams, and Contact Roles. The main content area is titled **Creating the Role Hierarchy** and displays a tree structure of roles. The right sidebar shows user information for Rayniel Joshua Lucido and display density options.

Conclusion:

Working on the Salesforce CRM project for HandsMen Threads was a great learning experience that helped me use both my technical and analytical skills. I started by setting up a developer account and creating custom objects like Customers, Products, Orders, Inventory, and Marketing Campaigns. I added custom fields, validation rules, and permissions to keep data accurate and secure, and created email templates and flows to automate order updates, stock alerts, and loyalty messages. I also used Apex triggers and batch jobs for automatic calculations and inventory updates.

Through this project, I learned how Salesforce can manage real business operations and improve sales and marketing processes. Although I faced challenges with flows and validation rules, solving them improved my problem-solving skills and attention to detail. Overall, it was a rewarding project that strengthened my Salesforce knowledge and confidence for future CRM work.
